

TRITAN SURVEY

3-D Laser Scanning • Engineering & Hydrographic Surveys

CAD Technician

Tritan Survey, one of Africa's leading survey companies, is seeking to employ a CAD technician on a permanent basis, to be based at their offices in Diep River, Cape Town.

If you can work to deadlines, enjoy being part of a dynamic, forward thinking and technically focused team, with great attention to detail, we would welcome the opportunity to engage with you. Whilst ongoing training is part of our company ethos, we are looking for that rare someone who can hit the ground running.

Key Responsibilities:

- Prepare detailed topographical survey drawings using Microstation, USMART and CAD
- Utilize point clouds to create 3D and 2D survey drawings
- Communication and collaboration with survey team
- Assist with final project delivery
- Other CAD production tasks

Minimum requirements:

- A Degree/Diploma in Geomatics
- At least 4 years CAD experience in topographical drawings
- Experience with Bentley Microstation, uSmart, TMH-11 Survey Standard
- Experience with point cloud data

Key attributes

- Attention to detail
- Problem solver
- Eager to learn
- Works well under pressure
- Team player
- Understands the need to pivot quickly based on client and project requirements.

Closing Date for applications: 20 December 2023
